

Fibre Coupling Optic

The Fibre Coupling Optic is the ideal lens for feeding light into a fibre optic bundle. The optic is compatible with the Luxeon range of High Brightness LED's.

The Fibre Coupling Optic is also useful for edge illumination, for example, to feed light into a Perspex backlighting sheet.

- Optimised for Luxeon LED's
- High optical coupling efficiency
- Fits standard holders
- Optical Grade Polycarbonate
- Can be used for edge illumination
- Designed for 6mm, 0.48NA Fibre Bundles
