

# **DUV-HL46N**

- Deep Ultraviolet Light Emission Source
- 310, 325, 340 nm
- TO46 metal can
- Hemispherical UV lens
- Beam angle 6-12 deg.

# Description

**DUV-HL46N** is a series of **AIGaN** based single emitter DEEP-UV LEDs in a hermetically sealed TO46 package, utilizing a hemispherical UV glass lens with a beam angle of 6-12 degree. **DUV-HL46N** is available from 310 nm up to 340 nm peak wavelength with an optical output power of typically 0.9 mW.

# Maximum Rating (TCASE = 25°C)

| Doromotor                              | Symbol       | Va   | Unit  |      |

all dimensions in mm

# **Precautions**

#### **Static Electricity:**

**LEDs are sensitive to electrostatic discharge (ESD)**. Precautions against ESD must be taken when handling or operating these LEDs. Surge voltage or electrostatic discharge can result in complete failure of the device.

#### **UV-Radiation:**

During operation these LEDs do emit **high intensity ultraviolet light**, which is hazardous to skin and eyes, and may cause cancer. Do avoid exposure to the emitted UV light. **Protective glasses are recommended**. It is further advised to attach a warning label on products/systems that do utilize UV-LEDs:

### Operation:

#### Do only operate LEDs with a current source.

Running these LEDs from a voltage source will result in complete failure of the device.

Current of a LED is an exponential function of the voltage across it. Usage of current regulated drive circuits is mandatory
